Continuation of 11. does NOT place the application in condition for allowance because: (It is initially stated that the amendment is for formal matters, and the response is essentially a request for reconsideration). Applicant's argument, directed primarily in regard to claim 1, contends that the testing jig of Richard is not part of the video network when the jig is mobile and cannot access the AV data as the data travels over the network. This is not the case. The jig is part of the network simply because is it in physical and electrical communication with it and operates with the network as a composite system. It is part of the network at least in that sense. Furthermore, it clearly accesses the AV data because that is its purpose as a testing device of a network that passes AV data. Richard Claim 1 does not even recite the tool (or anything) being a part of the network.
